

Career/College Fair **at** **Paisley Magnet School**

On Monday, April 11, 2011, Paisley IB Magnet School held its first Career/College Fair in the middle school gymnasium. Community participants from eighteen companies, which included the City-County Planning Board, six colleges/universities, and one military recruiter, attend the event. Sixteen classes with around 300 eighth, ninth and tenth grade students participated in the Career/College Fair. Student Ambassadors and staff were available to assist the community participants during the event.

Students were assigned to complete a sheet on four different careers. Each class had twenty minutes to talk with four different community representatives that were among the twenty-five businesses, colleges, and universities in attendance that day.

The City County Planning Board (CCPB) staff was able to provide students information on choosing a career in planning and how to become involved in their community. The CCPB is dedicated to providing educational resources for students and teachers to help them learn not only about the planning profession but to gain knowledge about the planning process and how they can become active citizens within their neighborhoods.
